

## Appendix R - Cultural Resources- Site Specific Impacts, Site Condition and Management Actions

Below is a compilation of data for all sites within the Planning Unit including National Register Eligibility, Management Priority, Impact Agents, Site Type, Site Condition and Proposed Actions. Nearly two thirds of the sites have not been visited since they were originally recorded, as many as 20 years ago. Since site recording standards have dramatically changed since the mid-1980s, many of these sites have not been adequately documented.

Most of the sites in the Planning Unit have not been evaluated for eligibility to the National Register of Historic Places. The sites will have to be evaluated for eligibility before management priorities and management actions can be determined. Site re-recording and condition assessment and evaluation will be completed at sites with the highest potential for eligibility, as budget allows.

Data included in this table was derived from the Oregon Heritage Information Management System database and Burns Field Office GIS.

**ANDREWS MANAGEMENT UNIT/STEENS MOUNTAIN COOPERATIVE MANAGEMENT AND PROTECTION AREA  
PROPOSED RESOURCE MANAGEMENT PLAN AND FINAL ENVIRONMENTAL IMPACT STATEMENT**
